Custom games are a way for people to create their own foyer in Fortnite Battle Royale and thus give them the opportunity to invite up to 100 people in their own private game. These games are often referred to as Fortnite customs, pro customs, personal scrims, personal pro scrims, personal games, Fortnite personal lobes, private games, or private scrims. Custom ScrimsProfessional and competing players have been doing scrims and pro scrims for a long time to prepare for tournaments and online qualifiers. Previously, it was a boring process by trying to get into the same game by queuing for a game at the same time. Often the servers will be very divided, and most of the servers will be random people. By doing scrims with personal match keys, only players who have the key can join the scrim games. Custom Pro ScrimsProfessional players have their own small communities, usually organized via Discord. Discord is a chat application, which makes it easy to create servers and invite people to join these servers. Here they can talk, chat and most importantly - share custom codes with each other. How to organize custom games and custom scrims workPlayers will usually organize in a Discord server. Discord servers may have many configurations, but in Fortnite setup is almost the same. Some Discord servers are open to everyone to join, while professional players often have closed Discord servers that have specific requirements to be fulfilled to join. This is usually how a game is organized: One player with access to personal match making will act as a host or personal host. The host is the one that creates the game within Fortnite, announces the game in the Discord server and places the custom code (the custom match key)Everyone else sees the announcement, fill in the personal key in-game and connect with the gamelt will put them in a string when some time is over, and enough players have queued for the game , the personal host will start the game All players will now be linked to the same private lobby in FortniteThings to be aware of In order to join, people should have the correct settings:They should be in the same server region (in Fortnite, e.g. EU, NA East, NA West or so on). They should be in the same game mode (e.g. Solos, Duos, Arena Solo, etc.) They should be in the same code if the host If they sit in another server region, for example, they won't be able to join Incustom Game RulesS as everyone in the game is in the same Discord server, it is possible to set up personal rules. Custom rules are in place to make more competitive or simulate a more competitive environment. People breaking the rules will usually be given a warning or prohibited for a specific time from the Discord server. Example of personal rules: No one can fight or shoot against each other before the 3rd circle closed (3rd circle refers to the storm in Fortnite). No one can use aircraft Not one can use ballers How to access personal matches in Fortnite Rental, only people who have a support-a-creator code can offer personal match matches in Fortnite. At the time of writing, it is unclear whether everyone will get this opportunity in the future. If you want to offer personal games yourself, you'll have to apply for the EPIC Games support-a-creator program. To be eligible to become a creator, you must comply with the following requirements: Have at least 1,000 followers on at least one large social platform (e.g. Twitter, YouTube, Twitch, Facebook)Complete the affiliate agreement and stay with the EPIC Games Creator Code of ConductBe able to receive payment in a form that supports Epic (PayPal is one of them)Once you apply, it may take some time for EPIC games to return to you. PC, Xbox, and PlayStation custom scrimsin custom games, all platforms are able to join. This makes it much easier to organize scrim games because it is so easy for people to join the same scrim game regardless of their platform. Fortnite Custom Scrim Discord server list We have created a list of servers where personal games are hosted. When you join a server, please make sure you read the rules in the server. Often, servers will also require you to verify and connect your EPIC Games account to your Inaudria account. In this way they can easily ban people who break the rules.
